

★ Skills

- use software design patterns
- computer programming
- interpret technical requirements
- use software libraries
- ICT project management methodologies
- use technical drawing software
- optimise choice of ICT solution
- develop automated migration methods
- think analytically
- systems thinking
- solve technical problems
- troubleshoot
- define software architecture
- design enterprise architecture
- design thinking
- use markup languages
- Microsoft Office
- Organizational and planning skills
- Team-work oriented
- Good listener and communicator
- Written and Verbal skills
- Decision-making
- Presenting
- Analytical skills
- Critical thinking
- analyse business requirements
- align software with system architectures
- use an application-specific interface
- analyse software specifications
- develop software prototype
- apply ICT systems theory
- system design

Pavol Ostertag

Date of birth: 03/08/1983 | Gender: Male | Nationality: Slovak | Home address: (Luxembourg)

🎓 Education & Training

Master of Engineering

01/09/2002 – 24/06/2008

Slovak University of Technology in Bratislava | Bratislava, Slovakia

- Software Development
- Digital Communications & Signal Processing
- Transmission & Communication Networks
- Wireless & Mobile Technologies
- Network Mathematics
- ICT Integration
- Network Design & Operation
- System Integration
- ICT Management & Security
- Data & Media Handling

Level in EQF: 7

💼 Work experience

Principal Software Architect

01/03/2009 – Current

ESET spol. s r. o. | Bratislava, Slovakia

Defined and drove the company-wide architecture vision and strategic technology direction.

Provided technical leadership and mentorship to the architecture team.

Applied Domain-Driven Design (DDD) principles together with Agile/SAFe methodologies to align business and technical domains.

Designed and maintained a UML-based visual language enabling model-driven and AI/LLM-assisted generation of ArchiMate views, interface definitions (gRPC, OpenAPI), and other enterprise and solution architecture artifacts using JavaScript tooling.

Implemented Architecture-as-Code and API-first principles across software delivery pipelines.

Authored, maintained, and governed enterprise architecture guidelines, standards, and architectural guardrails.

Prepared and delivered presentations for C-level stakeholders, explaining complex technical concepts in business-oriented terms.

Designed and supervised SecOps and IT Operations integration interfaces with a strong focus on consistency, interoperability, and business-domain alignment.

Led architectural modernization initiatives, including decomposition of legacy monoliths into microservices and modolith-based systems.

Collaborated with external and private security partners on tailored cybersecurity solutions aligned with specific operational and regulatory requirements.

Redesigned applications toward cloud-native and hybrid-cloud

- task algorithmisation
- object-oriented modelling
- systems development life-cycle
- AJAX
- unified modelling language
- JavaScript
- security engineering
- business process modelling
- define technical requirements
- oversee development of software
- create software design
- design process
- create flowchart diagram
- problem-solving with digital tools
- solve problems
- cooperate to resolve information issues
- C++
- Strategic Planning
- Power Point
- Creativity
- Python (computer programming)
- cloud technologies
- cloud security and compliance
- do cloud refactoring
- design cloud architecture
- Adobe Photoshop
- graphics editor software
- Enterprise Architect
- operate open source software
- define technology strategy
- lead a team
- provide mentorship
- Agile development
- lead others
- Scaled Agile framework
- software design methodologies

architectures.

Architected and contributed to ESET PROTECT and related products using C++, Go, C#, and Protocol Buffers.

Perl, C++ Developer for UMTS and LTE 01/05/2007 – 01/03/2009

Nokia Siemens Networks (NSN) | Munich, Germany

Implementation of MAC layer (PDCP) of 4G (LTE) protocol stack for LTE eNode B in embedded OSE environment (C++)

Development of testing environment of HSDPA MAC layer protocols for UMTS Node B (Perl)

Contact with plethora of protocols and architectures used across telecommunications industry

Web application developer 01/12/2002 – 01/05/2007

bitmedia (then part of Siemens AG Austria) | Graz, Austria

Development of e-Learning application for enterprise customers (HTML, JavaScript, CSS)

Development of tools in Linux/Unix environment (bash, Perl)

Backend development (PHP, Oracle, SQL Server, MySQL)

- develop with cloud services
- design application interfaces
- use interface description language
- collaborate with engineers
- define integration strategy
- design component interfaces
- ICT system programming
- Archimate Modeling
- Archimate 4
- conduct public presentations
- cyber security
- ICT system integration
- develop information security strategy
- service-oriented modelling
- Open source model
- REST, gRPC
- demonstrate loyalty
- use presentation software
- prepare presentation material

🗨️ Language Skills

• English

- Spoken production: C1
- Spoken interaction: C1
- Writing: C1

• German

- Listening: B1
- Reading: B1
- Spoken production: B1
- Spoken interaction: B1
- Writing: A2
